Portugal, what a country to invest!!...

Real estate investment in Portugal will *boom* again, from geographical and socioeconomical causes to tax and legal incentives, added to a consolidated annual grow of investment and transactions of the last four years and not forgetting the motivating *yields*, the high valuation of the assets and the good expectation of return, **made that Portugal became countries under the attention of all investors in the world!**

Portugal and its cities in particular are currently **in the target of several investors all over the globe**, from US or Brasil, throughout Europe and Africa, to Middle East, China and Russia.

Under this matter, we must point out the fact that the **total amount of investment** made in all sectors of the Portuguese real estate market in the last year reached an **expressive amount of € 30 billion**, which represents an **increase of 20% per year**.

If we add up all the **real estate investment made in Portugal in the period 2014-2019** we hit a **number absolutely record of roughly € 130 billion**.

We should also mention the **roughly € 25 billion of foreign investment made in this sector in the period 2014-2019**, which helped not only to rehabilitate many of the Portuguese cities, but also to grow the entire economy.

This said, Portugal will continue deserving the attention of the international (and also local) investors and we expect that our Country still represent an interesting and secure destination of investment.
